

Company Presentation 2020.

As an innovative expert in complex IT solutions, our focus is on IT infrastructure integration. As part of our independent system integrator role, we provide our clients a complete service in designing, building, and operating IT infrastructure.

As a registered SAS Silver Partner, we offer pre-designed solutions for data analytics systems, associated with deployed or cloud-based infrastructure. Answare Ltd. also has experience in the field of Artificial Intelligence, acquired through a Research & Development project while designing a SAS Viya environment.

CORE CAPABILITIES FOR SAS

Answare Ltd. has deep experience in SAS installations, including solving integration challenges and has a solid, tested toolset and workflow which help avoid endless configuration.

With these methods the time and resources need of an installation phase can be highly reduced.

INSTALLATION EXPERIENCES

- System environment planning and sizing.
- Complete SAS architecture installation in MS Windows and Linux environments. (The installed environments are mostly in Amazon cloud IaaS platform.)
- Operating system, database and networking configuration.
- SAS hotfixing and patching.
- Infrastructure integration with security and back-office systems.

VALUE ADDED SUPPORT AND OPERATIONAL SERVICES

- In a cloud based MASP environment Answare provides continuous support for the installed SAS environments.
- Answare created a SAS architecture level monitoring and measuring system which helps for the day-to-day operation.

SPECIAL, OUT-OF-THE-BOX INTEGRATION CAPABILITIES

Answare has an own on-premise virtual infrastructure for pre-testing the complete installation and configuration process to avoid the occurrence of unknown problems at the Customer.

In many cases the end user has to integrate their existing security and user management policies to the SAS systems.

Typical problems, issues:

- Secure communication between SAS and other operational environments.
- Active Directory/LDAP integration and synchronization.
- Database security.

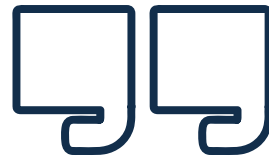

OUR REFERENCES IN SAS INSTALLATION

Banking:

- Coast Capital Savings, **Canada**
- BCP, **Switzerland**
- SJP UK, **United Kingdom**
- DKB, **Germany**
- IPF Digital, **Poland**
- Bulgarian Development Bank, **Greece**
- NINS, **Bulgaria**
- MKB, **Hungary**
- OTP, **Hungary**

Private sector:

- Lufthansa Airplus MASP environment, **Germany**

We have cooperated with Answare Ltd. in a couple of project implementation in AML and CDD areas.

We are very satisfied with their expertise in SAS installation and configuration.

Moving on with new projects and new customers we would be happy we cooperate again.
